1

We monitor your websites

s for crashes and availability. This helps you get an overview of the quality of your applications and to spot trends in your releases.

2

We notify you

s starts happening using Slack, Microsoft Teams, mail or other forms of communication to help you react to errors before your users do.

3

We help you fix bugs

uickly by combining error diagnostic information with innovative quick fixes and answers from Stack Overflow and social media.

Learn more about logging and tracking errors - notifications and integrations
