Coding Exercise

Create a function named `imageGen` that takes for argument a prompt. The function should create `1` image with a size `256x256`. Save it in the file `my_image.jpg`.

TRY IT!

Command was successfully executed.

Click to refresh your image

When ready to submit, please click the button below.

```
def imageGen(prompts):
  response = openai.Image.
    prompt=prompts,
    n=1,
    size="256x256"
  )

  image_url = response['da
  img_data = requests.get(
  with open('my_image.jpg'
    handler.write(img_data
imageGen("a cool car on wa
```

The student is suppose to create a function that takes the prompt as argument. From there, the call the `openai.Image.create` to generate `1` image with a size `256x256` as per the instructions.

Check It!
