1. What subsystems are included in A2D2 DDoS Defense Evaluation Testbed? What are their purposes? **0 / 1 point**

- ( ) DDoS Traffic Generating Subsystem using Snort Subnet Flooding detection module, firewall with CBQ and Multi-level Rate limiting features
- ( ) Web systems for evaluating the impact of DDoS attacks
- ( ) Real time streaming subsystem for evaluating the impact of DDoS attacks
- (•) DDoS Detection and Response Subsystem using Stachdrals

Incorrect

Incorrect. Please review the previous modules content on DDoS defense systems.

2. Iptables can be used to restrict the bandwidth used by certain traffic. **1 / 1 point**

- ( ) We use "iptables -N level2" to remove chain level2
- (•) Here the command "iptables -A level2 -m –limit 100/s -j ACCEPT" is used for limiting the traffic classified by level2 chain to share only 100 packets per second.
- ( ) To include traffic from 12.34.56.0/24 subnet in level2 chain, we use "iptables -I Forward -d 12.34.56.0/24 -j level2"

Correct
Correct.

3. The goals of A2D2 Adaptive Multi-level Rating Limiting System are **1 / 1 point**

- ( ) Block traffic right away when the volume exceed certain threshold.
- (•) Allow legitimate traffic with high traffic volume to come in

Correct
Correct.

4. The subnet flooding detection is implemented as a module of **1 / 1 point**

- ( ) Firewall
- (•) Snort

Correct
Correct.

5. The features of class-based Queuing (CBQ) enable us to **1 / 1 point**

- ( )
