We keep your highest score

○ More than 100 thousands.

○ Less than one thousands.

○ Less than 10 thousands.

○ Correct

○ Correct

Like

Dislike

Report an issue

Correct. More than 1.75k different IP addresses.

3. How long it last in the DDoS attack of Brian Krebs' site after Google Shield taking him in?

1 / 1 point

○ Less than 12 hours.

○ Less than 1 day.

● More than two weeks

○ Correct

○ Correct

Correct. After two weeks finally die down.

4. What are top four countries of origin of Mirai DDoS attacks?

1 / 1 point

○ Japan

● Vietnam

○ Correct

○ Correct

China

○ Correct

○ Correct

● Brazil

○ Correct

○ Correct

5. Why DNS Reflection Attacks are harder to defend that other types?

1 / 1 point

● The senders of the received DNS zone transfer data are legitimate DNS servers.

○ Correct

○ Correct

The victim receives short messages.

● The cracker uses IP spoofing and pretends it is the victim that request the DNS Zone Transfer data.

○ Correct

○ Correct

It is difficult to trace back to the attackers.

○ Correct

○ Correct

Correct. Reflective attacks requires us to track the path beyond the victim server and the involved DNS servers.
