Select all that apply.

Like | Dislike | Report an issue

- [x] It utilize a lot of compromised node spreading out in Internet and hope to overwhelm all internet routes to the victim. Y

  Correct
  Correct. Leave no alternate routes for the victim.

- [ ] With the increasing large number of compromised IoT devices, the related DDoS attacks now generate hundred of megabit per second attack traffic.
- [ ] It does not attack small business.
- [x] It consumes most the bandwidth of the victim's internet connection.

  Correct
  Correct.

2. The nature of Mirai DDoS attacks. **1 / 1 point**

Select all that apply.

- [ ] It does not use DNS amplification attack to increase the volume of bandwidth consumption.
- [x] It utilize large compromised IoT devices which use telnet (unsecure protocol) and easy to guess passwords.

  Correct
  Correct.

- [ ] It does not use reflective DDoS attacks with IP spoofing.
- [x] The compromised IoT devices spread all over the world. Allow them to attack victim from many corners of the Internet.

  Correct
  Correct.

3. The source of Mirai provides clues of the profile of the designer. **1 / 1 point**

- ○ Novices who are not familar with the hacking and related defense techniques.
- ◉

Russian

- ○ They choose the victim IP addresses randomly.

  Correct
  Correct.

4. The types of Mirai IoT attacks on Brian Krebs' site after Google Shield took it in. **1 / 1 point**

Select all that apply.

- [x] It uses IP spoofing in DNS reflection attack.

  Correct
  Correct.

- [ ] In DNS reflect attack, the IoT devices launch large 1200 byte DNS query request and result in fast 4000 short DNS zone transfer packets sent from legitimate DNS servers to the victim.
- [x] It utilizes a mix of TCP sync flood, TCP Syn-Ack flood, UDP, HTTP, and GRE packets

  Correct
  Correct.

5. How long is the Mirai IoT attack on Brian Krebs' site after Google Shield took it in. **1 / 1 point**

- ◉ more than two weeks
- ○ Less than one day
- ○ Less than a week

  Correct
  Correct.

6. What are the geo-distribution of the IoT devices compromised by Mirai malware? **1 / 1 point**

- ○ They are mainly in Brazil.
- ○ They are mainly in Europse.
- ◉ They are from all corners of the world.

  Correct
  Correct.

7. Mirai DDoS Attack intensity in Brian Krebs' site After Google Shield took the site in. **1 / 1 point**

- ◉ It exceeds 130 M packets per second traffic.
- ○ It exceeds 1 Terabits per second traffic.
- ○ it exceeds 600 Gbps of DNS Reflection attack.

  Correct
  Correct.

8. From the Mirai source code analysis, we know it rather sophistated. **1 / 1 point**

Select all that apply.

- [x] It tries to avoid sites with lot of resources, potentially nat counteract or go after the attackers, such as US DoD.

  Correct
  Correct.

- [x] It tries to avoid sites with DDoS Defense services such as Cloudflare.

  Correct
  Correct.

- [ ] It integrated with smart password cracking tools.

9. How Mirai secure the IoT device it compromised? **1 / 1 point**

- ○ It installs IDS software to detect trojans or worms by other hackers in the victim device.
- ◉ It shuts down the ports such as telnet, ssh and http to prevent others from inflecting the victim again.

  Correct
  Correct.

10. Computer Forensic: Profiling the designer of Mirai **1 / 1 point**

- ○ Based on the name, it is designed by a Japanese hacker.
- ◉ Based on the prompts and embedded character code, it was designed by Russian.

  Correct
  Correct.
