

A2D2 Design and Implementation,

Reading the following sections of A2D2 Design and Implementation, Angela Cearn's master thesis. The pdf file of the full version is attached here:

iptables tutorial: While it's not necessary to read and memorize the entirety of iptables, the following will help as a reference to understand how prevention methods in iptables can work. An In-Depth Guide to iptables, the Linux Firewall by [Supriyo Biswas](#)  · June 18, 2017

<https://www.booleanworld.com/depth-guide-iptables-linux-firewall/> 

Class-based Queueing (CBQ):

Section 3.2.2, Pages 50-55, of Angela Cearn's master thesis.

Multi-level rate-limiting :

Section 3.2.3, Pages 56-58, of Angela Cearn's master thesis.

DDoS Autonomous Detection and Response System:

Section 3.3, Pages 58-65, of Angela Cearn's master thesis.

A2D2 Testbed setup:

Chapter 4, Pages 66-77, of Angela Cearn's master thesis.

Defense By Design: How To Dampen DDoS Attacks With A Resilient Network
