Autonomous Anti-DDoS Network (A2D2)

Performance of CBQ/Rate Limit on DDoS Traffic Types

- **Video:** Performance of CBQ/Rate Limit on DDoS Traffic
 7 min
- **Reading:** A2D2 DDoS Defense Experiments
 10 min
- **Practice Quiz:** Practice Quiz: 2.3.2 DDoS Impact Analysis
 30 min
- **Discussion Prompt:** How can A2D2 be scaled up?
 15 min

Exam 2.3

Congratulations! You passed!

Grade received 100% **To pass** 80% or higher

Practice Quiz: 2.3.2 DDoS Impact Analysis

1. Effective of Firewall rule against CBQ based DDoS attack. **1 / 1 point**

- It is very effective. The real streaming clients are not affected or receive attacked traffic at all.
- It is rather effective. The streaming one packet or get delayed 2-3 times and need to refill the playout buffer.
- It is not effective. The streaming connections are lost.

Correct
Correct.

2. What are the advantages of using histogram to display the impact of the DDoS attacks? **1 / 1 point**

- Show the maximum of traffic bandwidth that is actually delivered over time.
- Show effectively the disruption of client reception in terms distribution and frequencies.

Correct
Correct.

3. What is the impact of ICMP DDoS attacks in the A2D2 experiments? Slide 6 of the presentation. **1 / 1 point**

- The real streaming service was not affected at all.
- There is significant loss of streaming packets and it results in connection timeout.

Correct
Correct. There gaps in histogram of traffic volume.

4. What combination of DDoS defense mechanism is showned to deal with ICMP DDoS attacks? Slide 7. **1 / 1 point**

- Firewall and subnet flooding detection.
- Firewall policy and CBQ

Correct
Correct.

5. What is the impact of DDoS attacks based on TCP on the defenses with Firewall policy and CBQ? **1 / 1 point**

- It shows a significant impact on the quality of movie playback. 1449 packets lost; 22179 packets received.
- It shows the Firewall policy and CBQ together are adequate to deal with TCP based DDoS attacks.

Correct
Correct.

6. What is the impact of DDoS attacks based on TCP when we turn on defenses with Firewall policy, CBQ, and rate limiting? **1 / 1 point**

- It improves. We see fewer retransmission requests and less packet loss than with only firewall+CBQ. The quality of movie playback is ok.
- The movie playback still suffers. Quality is not good.

Correct
Correct.
