Policy paper

AI regulation: a pro-innovation approach

This white paper details our plans for implementing a pro-innovation approach to AI regulation. We're seeking views through a supporting consultation.

Annex C: correction (4 July 2023)

We have been notified of minor errors in Annex C by a stakeholder. The formal consultation

period closed on 21 June, but we continue to engage with stakeholders in view of the fast-moving AI landscape. We encourage those who wish to engage with us further around the issues explored in the consultation to email us at evidence@officeforai.gov.uk.

In the [National AI Strategy](https://www.gov.uk/government/publications/national-ai-strategy) (<https://www.gov.uk/government/publications/national-ai-strategy>), the government committed to developing a pro-innovation national position on governing and regulating AI, and we outlined our position in a [policy paper](https://www.gov.uk/government/publications/establishing-a-pro-innovation-approach-to-regulating-ai/establishing-a-pro-innovation-approach-to-regulating-ai-policy-statement) (<https://www.gov.uk/government/publications/establishing-a-pro-innovation-approach-to-regulating-ai/establishing-a-pro-innovation-approach-to-regulating-ai-policy-statement>) in 2022. This white paper sets out the government's proposals for implementing a proportionate, future-proof and pro-innovation framework for regulating AI.

The [UK Science and Technology Framework](https://www.gov.uk/government/publications/uk-science-and-technology-framework/the-uk-science-and-technology-framework#regulation-and-standards) (<https://www.gov.uk/government/publications/uk-science-and-technology-framework/the-uk-science-and-technology-framework#regulation-and-standards>) sets out the government's strategic vision to make the UK a science and technology superpower by 2030. It identifies AI as one of five critical technologies and notes that regulation plays an important role in creating an environment for AI to flourish.

Through this new approach to AI regulation, the government will help the UK harness the opportunities and benefits that AI technologies present. This will drive growth and prosperity by boosting innovation and investment, and building public trust in AI. It will strengthen the UK's position as a global leader in AI, by ensuring the UK is the best place to develop and use AI technologies.

Consultation

We [consulted on the white paper and the related impact assessment](https://www.gov.uk/government/consultations/ai-regulation-a-pro-innovation-approach-policy-proposals) (<https://www.gov.uk/government/consultations/ai-regulation-a-pro-innovation-approach-policy-proposals>).

The consultation closed at 11:45pm on 21 June 2023.

We are analysing your feedback.
