 excel/supplement/Mp06r/feedback-survey) excel/lecture/TUihw/introduction-to-binary-classification)

You will need the Excel workbook Binary Classification to master the instructional content and successfully complete the quizzes for Week 2.

The Excel workbook contains a series of sheets applicable to the concepts covered in the video lectures. You will use the relevant sheets to complete exercises for the week.

The Binary Classification Workbook can be downloaded by clicking on the button below:

Binary Classification Workbook.xlsx (<https://d3c33hcg...>)

Here is a table listing the Excel sheets associated with each video lecture in Binary Classification. Note that you will see additional information in the sheet title, but we will always direct you to the correct sheet by the hyphenated number that begins the sheet title.

Video	Excel Sheet
Introduction to Binary Classification: Bombers and Seagulls	3-1, 3-3A, 3-4
Confusion Matrix Definition	3-2
Costs Determine Threshold	3-3B, 3-3C
Bombers and Seagulls: Excel Application	3-1, 3-3A, 3-4
Calculating Positive and Negative Predictive Values	3-5
Calculating Area Under Curve	3-6
Binary Classification with More than One Input Variable	3-7

Important! Please note that not every lecture will have an associated Excel workbook sheet. Also, be aware that some Excel workbook sheets will be used in more than one video lecture. Therefore, you will sometimes see the same Excel workbook sheet cited for use in multiple video lectures.
