COACH

1. Which of these are reasons that you can't push your TensorFlow model to Google Cloud?
all that apply.

☐ You are tied to on-premises or multi-cloud infrastructure due to business reasons.

2. A key principle behind KubeFlow is portability so that you can:

👍 Like

👎 Dislike

🚩 Report an issue

☒ Move your model from on-premises to Google Cloud.

☐ Migrate your model from TensorFlow to PyTorch.

☐ Convert your model from CUDA to XLA.

☒ Correct

Correct! Portability is at the container level, and you can move to any environment that offers Kubernetes.

3. Which of the following determines the correct property of Tensorflow Lite?

☐ Increased code footprint

☒ Quantization

☐ Higher precision arithmetic

☐ Lower precision arithmetic

☒ Correct

Correct!

4. To copy the input data into TensorFlow, which of the following syntaxes is correct?

☐ inferenceInterface.feed(floatValues, 1, inputSize, inputSize, 3);

☐ inferenceInterface.feed(inputName, floatValues, inputSize, inputSize);

☒ inferenceInterface.feed(inputName, floatValues, 1, inputSize, inputSize, 3);

☐ inferenceInterface.feed(inputName, floatValues, 1, inputSize, 3);

☒ Correct

Correct!
