TensorFlowInferenceInterface.feed() fails to accept multi-dimensional input #17791

✔ Closed

hoonkai opened this issue on Mar 17, 2018 · 1 comment

hoonkai commented on Mar 17, 2018 • edited

Describe the problem

My understanding is that `TensorFlowInferenceInterface.feed()` takes a 1D float array `float[]` as input.

Source code / logs

```
float[] floatValues;
TensorFlowInferenceInterface inferenceInterface;
int inputSize;
String inputName;
...
inferenceInterface.feed(inputName, floatValues, 1, inputSize, inputSize, 3);
```

- hoonkai changed the title TensorFlowInferenceInterface.feed() doesn't accept 4-dimensional input TensorFlowInferenceInterface.feed() fails to accept multi-dimensional input on Mar 17, 2018
- hoonkai closed this as completed on Mar 17, 2018

glen-martin commented on May 25, 2018

could you tell us the solution, please?
