3.5 Sensing Color Self-check Quiz

1.

In what range of wavelengths do photons of quantum efficiency of silicon 1 i.e. all photons of that wavelength get converted into electrons?

1 / 1 point

Ready to review what you've learned before taking the quiz? I'm here to help.

Below 400 nm

Between 400 nm and 1100 nm

Above 1100 nm

2.

Fill in the blank.
- Spectral responses of cones in our eyes are essentially ____ of Silicon atoms.

Spectral efficiency

Like

Dislike

Report an issue

Quantum efficiency

Photoelectric effect

Correct

It is essentially the response to incoming photons for a corresponding color.
