5.2 Pixel Processing Self-check Quiz

1. What is the output image o if each of the following point processing is applied to the input image i .

1. $h(x, y) = f/2$

Ready to review what you've learned before taking the quiz? I'm here to help.

2. $o(x, y) = h + 130$

✦ Help me practice

✦ Let's chat

$f(x, y)$ is:

0	128	56	70
254	24	2	100
0	0	0	0
58	78	62	120

255	142	131	180
130	130	130	130
159	169	181	190

130	194	158	165
257	142	131	180
130	130	130	130
159	169	161	190

256	194	158	165
250	142	140	180
130	130	130	130
159	169	160	190

 Correct

1st operation: $\hbar = f/2$

That is, divide every pixel by 2. We get the following image:

0	64	28	35
127	12	1	50
0	0	0	0
29	39	31	60

2nd operation: $o = h + 130$

That is, Add 130 to every pixel value. We get the following image:

130	194	158	165
257	142	131	180
130	130	130	130
159	169	161	190
