- [x] Brightness

Correct
Since both boxes have similar brightness, having that information doesn't help much. A similar explanation holds true for texture as well because they both have similar textures. However, depth information is helpful in separating the boxes because they are at different distances.

- [] Depth
- [x] Texture

Correct
Since both boxes have similar brightness, having that information doesn't help much. A similar explanation holds true for texture as well because they both have similar textures. However, depth information is helpful in separating the boxes because they are at different distances.

- [] All are useful
