Using Our Box

Let's use our new playground to generate a couple more prompts. Feel free to modify at your own leisure. But practice running the following prompts

1. Generate blog posts, essays, and other forms of copy.

write a short essay about willy wonka

TRY IT!

write a short essay about willy wonka

Willy Wonka is one of the most iconic fictional characters of all time. He is the eccentric owner of the world's largest chocolate factory and is known for his creative and innovative candy creations. Wonka is a true visionary and his passion for confectionary is unmatched. He is a true pioneer in the industry and has inspired countless other candy makers. Wonka's candy is enjoyed by people all over the world and his legacy will continue to live on for generations to come.

Play Guide

We can click on the wrap in our drop-down menu.

2. Utilize GPT-3 to generate product descriptions, titles and other marketing materials.

Write a description for Codio, the best learning website.

TRY IT!

Write a description for Codio, the best learning website.

Codio is the best learning website because it offers a great variety of courses, a wide range of topics, and a community of like-minded individuals.

3. Use GPT-3 to automate customer support tasks such as FAQs and customer service emails.

generate a customer service email to apologize for our website being down. Let cus

TRY IT!

4. Leverage GPT-3 to generate technical documentation and software manuals.

generate a short technical document on how to use gpt-2.

TRY IT!

Command was successfully executed.

5. Automate the process of summarizing long articles with GPT-3.

summarise the content of this webpage (https://arxiv.org/abs/2005.14165).

TRY IT!

summarise the content of this webpage (https://arxiv.org/abs/2005.14165).

The webpage contains a paper titled "Achieving Linear Scaling Neural Machine Translation". The paper discusses how to achieve linear scaling neural machine translation, which would allow for neural machine translation to be done faster and more efficiently. The paper describes a method for doing this by using a novel neural network architecture.

Function Comprehension

What is the role of //clear// in the given playground?

To generate a random response

To clear the content of the text file

To clear the errors being generated

In the given playground, //clear// is used as a keyword. When the Python code sees this keyword in the text file, it triggers a function that clears the content of the text file. This can be helpful to quickly clean up the content of the file for the next operation.
