

**Your grade: 100%**

Next item →

Your latest: **100%** • Your highest: **100%** • To pass you need at least 80%. We keep your highest score.

1. Execute the Coursera Labs Jupyter notebook for this lesson. What is the root-mean-squared error between the estimate produced by the particle filter and the true state? Enter your answer with three digits to the right of the decimal point.

1 / 1 point

0.574

 **Correct**

Yes, that is correct.

2. For the same Coursera Labs Jupyter notebook, what is the minimum number of effective particles stored by the SIS algorithm during the execution of the simulation? Enter your result with two digits to the right of the decimal point.

1 / 1 point

101.20

 **Correct**

Yes, that is correct.

3. For the same Coursera Labs Jupyter notebook, what is the maximum standard deviation of the particle weights during the execution of the SIS-algorithm simulation? Enter your result with three digits to the right of the decimal point.

1 / 1 point

0.004

 **Correct**

Yes, that is correct.
