Submitted on October 26, 2023

[Shareable Link](#)**PROMPT****Submit Deliverable One: Jupyter Notebook or PDF Report**

The Jupyter notebook should show a brief EDA procedure, model building and training, results, and comparison with supervised learning. If your work doesn't fit into one notebook (or you think it will be less readable by having one large notebook), make several notebooks or scripts in the GitHub repository (as deliverable 2) and submit a report-style notebook or pdf instead.
