

Summarizing Posterior Inference and Prior Distributions Readings

For this lesson, read the following:

- [Section 2.4](#) : Informative prior distributions. In this reading, we discuss different kinds of prior distributions, including conjugate and nonconjugate prior distributions.
- [Sections 2.7](#) : Example: informative prior distribution for cancer rates. In this reading, we look at an example of an informative prior.
- [Sections 2.8 and 2.9](#) : This portion of the textbook discusses both noninformative and weakly informative priors and how this impacts our work.
