

Advanced Markov Chain Methods for Bayesian Computation Readings

For this lesson, read the following:

- [Chapter 11](#) : Basics of Markov chain simulation. This chapter in the textbook discusses Markov chain simulation, Gibbs sampler, Metropolis and Metropolis-Hastings algorithms.
- [First Links in the Markov Chain](#) . A discussion of the inspiration and several uses of Markov Chains simulation.
- [Markov Chain Simulator](#) . Not reading, per se, but a web application to illustrate Markov chains. Students are encouraged to experiment with it.

You may download the PowerPoint and Notes used in this lesson's video lecture here:
