Common statistical models

Matthew Heiner

Linear regression, ANOVA, logistic regression, multiple factor ANOVA

Learning Objectives

Assess the performance of a statistical model and compare competing models.

Specify, fit, assess, and use common statistical models for continuous and binary data.

▼ More

Use statistical modeling results to draw scientific conclusions.

Module Overview

Module 3 assignments and materials 3 min

7. Linear Regression

Introduction to linear regression 8 min

Setup in R 9 min

JAGS model (linear regression) 12 min

Model checking 17 min

Quiz:

Lesson 7 Part A 8 questions Due June 18, 11:59 PM PDT

 Alternative models 10 min

 Deviance information criterion (DIC) 4 min

 **Quiz:**
Lesson 7 Part B 6 questions Due June 18, 11:59 PM PDT

 Code for Lesson 7

8. ANOVA

 Introduction to ANOVA 10 min

 One way model using JAGS 18 min

 **Quiz:**
Lesson 8 8 questions Due June 18, 11:59 PM PDT

 Code for Lesson 8

9. Logistic Regression

 Introduction to logistic regression 6 min

 JAGS model (logistic regression) 18 min

 Prediction 15 min

 **Quiz:**
Lesson 9 8 questions Due June 18, 11:59 PM PDT

 **Discussion Prompt:**
Why linear models? 15 min

 Code for Lesson 9

Optional Honors Content

Multiple Factor ANOVA

 Multiple factor ANOVA 20 min

Quiz:

Common models and multiple factor ANOVA 5 questions Due June 18, 11:59 PM PDT
