

Course Logistics

Or "Course How to"

Hi folks. The logistics are easy. There are 2-4 videos for each week (module). You should watch them and work out for yourself when I present "problems". For weeks 2 though weeks 6 there are assignments, which are also called quizzes/HW. These are short answer or multiple choice, and usually consist of 4 or 5 questions. They are partly explained in the last module of weeks 2 though 6. They can also be accessed though "quizzes". After they are due, you will be asked to help grade some of your fellow students work. There are no programming assignments.

Participant Introduction

We want to get to know you. Please introduce yourself to the class [here](#)
