About the Course

Foundations of Generative AI

Overview of Large Language Models

Generative AI Landscape

✔ Reading: Key Terms

10 min

✔ Video: Introduction

1 min

✔ Video: OpenAI and ChatGPT

6 min

✔ Video: Hugging Face and Open Source models

4 min

✔ Reading: External lab: Interact with hosted models

10 min

✔ Video: Using local models

5 min

✔ Video: Cloud-based solutions

4 min

📎 Practice Assignment: Knowledge check

3h

✔ Quiz: Graded Quiz

Submitted

🎥 Video: Summary

Ready to review what you've learned before taking the quiz? I'm here to help.

1 / 1 point

What process turns text into numeric representations for machine learning models?

○ Probability machine

○ Deployment

○ Tokenizer

○ Encoding

✔ Submit your assignment

Due Aug 12, 11:59 PM IST

Try again

✔ Correct

✔ Receive grade

Correct! Encoding refers to converting text tokens into numeric values.

To Pass 80% or higher

1 / 1 point

What strategy involves combining search with an LLM to improve results?

✔ Retrieval augmented generation

○ Cloud deployment

○ Fine-tuning

○ Interactive API

✔ Correct

Correct! Retrieval augmented generation combines search with an LLM.

3.

1 / 1 point

What are some of the risks and challenges associated with using large language models?

○ Open source models

✔ Potential for incorrect or harmful information

○ Foundation models

○ Running models locally

✔ Correct

Correct! LLMs can sometimes generate incorrect or problematic content.

4.

1 / 1 point

What type of model is GPT-3 created by OpenAI?

○ Generative API

✔ Large language model

○ Foundation model

○ Retrieval Language Model (RLM)

✔ Correct

Correct! GPT-3 is a well-known large language model created by OpenAI.

5.

1 / 1 point

What company hosts a popular repository of open source AI models?

○ Microsoft

○ OpenAI

○ Mozilla

✔ Hugging Face

✔ Correct

Correct! Hugging Face hosts many open source models in their model repository.

6.

1 / 1 point

What technique adapts an existing model to a new, more specific task?

○ Quantizing

○ Tokenization

✔ Fine-tuning

○ De-tuning

✔ Correct

Correct! Fine-tuning trains a model further for a specific new task.

7.

1 / 1 point

What project from Mozilla allows running models locally on your computer?

○ Azure OpenAI Service

✔ LAMA-file

○ Hugging Face

○ OpenAI

✔ Correct

Correct! LAMA-file from Mozilla lets you run models locally.

8.

1 / 1 point

What are pre-trained deep learning models that can be adapted for new tasks called?

○ Large language models

✔ Foundation models

○ Probability models

○ Large OpenAI Models

✔ Correct

Correct! Adaptable pretrained models are referred to as foundation models.

9.

1 / 1 point

What is a risk or challenge with Large Language Models?

○ That they can generate large amounts of incorrect data

✔ That users can take results as truth or facts

○ That they can produce somewhat accurate data

○ High compute costs due to lack of GPU availability

✔ Correct

Correct! LLMs do not necessarily produce truth or facts and these have to be verified.

10.

1 / 1 point

What is a well-known approach that involves carefully crafting the input text prompts?

○ Interactive Prompting

✔ Prompt engineering

○ Text prompting

○ Prompt encoding

✔ Correct

Correct! Prompt engineering focuses on writing effective prompts.
