Ready to review what you've learned before taking the quiz? I'm here to help.

1 / 1 point

What practice involves crafting prompts carefully to provide context and get better responses from AI systems?

Rephrasing

Prompt engineering

Task breakdown

Limited input

What technique involves prompting the AI to explain its reasoning step-by-step to get more detailed responses?

Chain of thought

Feedback loop

Prompt first

Bookending

Correct

Correct! Chain of thought asks the AI to explain its reasoning process step-by-step.

3.

What practice involves asking the AI for suggestions when responses are poor and incorporating this into the next prompt?

Limited breakdowns

Feedback

Bookending

Task breakdown

Correct

Correct! Feedback asks the AI how to improve prompts and uses this.

4.

Providing too much context and instructions can overwhelm the AI, resulting in what?

Task breakdown

Poor or incomplete responses

Incorrect sources

Better responses

Correct

Correct! Too much context can overwhelm the AI, causing poor responses.

5.

What technique involves adopting a specific identity or perspective to influence the tone and language of the AI's response?

Setting the format and style

Setting tone and persona

Giving response examples

Setting the context

Correct

Correct! Setting the tone and persona will influence the response from an LLM.

6.

Breaking a complex request into smaller, more manageable prompts helps avoid what?

Poor responses

Formatting issues

Improper tone

Context overload

Correct

Correct! It avoids overloading the AI with too much context.

7.

Why is adding the task at the beginning of the prompt as well as at the end considered something beneficial?

To help in formatting

Correct tone in the response

Prevents limitation of context

It avoids the LLM forgetting the task

Correct

Correct! This technique helps reinforce the task at hand and avoids the LLM forgetting the specifics.

8.

What can you use in a prompt to help the AI understand and provide a more relevant response?

More context

Less context

A list of instructions

Use Few-shot examples

Correct

Correct! Context gives the AI more details to provide a more relevant response.

9.

Restating or rewording a prompt to help clarify intent and get better results from the AI is known as what?

Feedback

Rephrasing

Task breakdown

Context overload

Correct

Correct! Rephrasing involves restating a prompt to improve results.

10.

What practice involves iteratively improving a prompt and response by building on previous interactions?

Using Chain of Thought

Refining on previous context

Providing more context

Few-shot prompting on previous context

Correct

Correct! Refining allows incrementally improving prompts and responses.
