Review Learning Objectives

1. What is the purpose of OpenAI's DALL-E models?

1 / 1 point

☐ To perform speech recognition

☐ To fine-tune AI models

☒ To generate images from text

☐ To summarize large volumes of text

2. Which module did we introduce to our environment variables?

Your grade 100%

1 / 1 point

View Feedback

We keep your highest score

☐ GitHub

☒ OS

☐ OpenAI

☐ JSON

Like

Dislike

Report an issue

✔ Correct

Correct. Allowed us to interact with the operating system and save environment variables

3. What is fine-tuning also known as?

1 / 1 point

☐ Data engineering

☐ Speech recognition

☐ Text generation

☒ Transfer learning

✔ Correct

Correct. Fine-tuning is also known as transfer learning.

4. What is the purpose of the OpenAI's Whisper Models?

1 / 1 point

☐ To fine-tune AI models

☒ To perform speech recognition

☐ To transcribe audio files

☐ To generate images from text

✔ Correct

Correct. The purpose of the Whisper API is to perform speech recognition.

5. Why did we use regular expressions in our demo?

1 / 1 point

☐ To fine-tune AI models

☐ To prep data for sending it to OpenAI for text generation

☒ To extract specific information from the response

☐ To summarize audio files

✔ Correct

Correct. We used regular expressions to get the shopping list to send to DALL-E for image generation.

6. What is the purpose of the regular expression in the code?

1 / 1 point

☐ To fine-tune AI models

☐ To generate images from text

☐ To summarize audio files

☒ To extract the shopping list from the response

✔ Correct

Correct. The purpose of the regular expression is to extract the shopping list from the response.

7. Which company did we reference for their principles on trust and transparency.

1 / 1 point

☐ GitHub

☐ OpenAI

☐ Duke University

☒ IBM

✔ Correct

Correct. IBM provided three clear principles that were referenced in the AI Ethics and Business Section.

• The purpose of AI is to augment human intelligence.

• Data and insights belong to their creator.

• AI systems must be transparent and explainable.

8. What is the expected compound annual growth rate (CAGR) for GenAI from 2023 to 2030?

1 / 1 point

☐ 44.4%

☒ 34.3%

☐ 25.2%

☐ 41.3%

✔ Correct

Correct. According to Acumen Research and Consulting, the source we used in the course.

9. What are some of the reasons for the Local LLM Trends.

1 / 1 point

☒ It reduces business risk

✔ Correct

Correct. This is very new and several of these AI companies so there is no way to know what the landscape will look like in a few months.

✔ Models are much more available now than at the end of 2022.

✔ Correct

Correct. With sites like HuggingFace much smaller companies now have access to many GenAI models that they would not have been about to create themselves.

✔ Companies do want to be dependent on a third party

✔ Correct

Correct. If you are dependent on a GenAI Company for access (which means you are subject to changes in service fees etc.) vs. running a model on your own infrastructure.

10. What are some of the benefits of using GitHub Cospaces?

1 / 1 point

✔ Ability to work with AI Programming Tools

✔ Correct

Correct. CoPilot (AI Pair Programming) is an easy add to Codespaces.

✔ Clean Development Environment

✔ Correct

Correct. Starting a fresh instance for development helps developers avoid dependencies on their local machine.

✔ Easy integration with Git.

✔ Correct

Correct.
