1.

How is AI revolutionizing various industries?

1 / 1 point
- ☐

By reducing the need for cybersecurity measures

☐

By replacing all human jobs with robots

☒

By automating processes and improving efficiency

☐

By eliminating the need for any human oversight
- 

Correct

Correct! AI is significantly automating processes and enhancing efficiency across industries.

2.

What are the benefits of linking Large Language Models (LLMs) to data sources?

1 / 1 point

☐

Increased data redundancy

☒

Broader range of applications

Correct

Correct! It enables LLMs to be used in a broader range of applications.

☒

Improved accuracy in task execution

Correct

Correct! Linking LLMs to data sources can improve their accuracy.

☐

Faster data processing speeds

☒

Enhanced capabilities of generic LLMs

Correct

Correct! Linking LLMs to data sources enhances their capabilities.

3.

What are the steps involved in generating an OpenAI API key?

1 / 1 point

☒

Log in to OpenAI account

Correct

Correct! Logging in is the first step to generating an API key.

☒

Navigating to the API section on the dashboard

Correct

Correct! Navigating to the API section is necessary for generating the key.

☐

Email verification

☒

Clicking on 'Generate new API key' button

Correct

Correct! You need to click the 'Generate new API key' button.

☐

Completing a CAPTCHA

4.

Which of the following capabilities are offered by OpenAI's models?

1 / 1 point

☐

Weather forecasting

☒

Language translation

Correct

Correct! OpenAI models can be used for language translation.

☐

Image recognition

☒

Code generation

Correct

Correct! OpenAI models can generate code based on given prompts.

☒

Text summarization

Correct

Correct! OpenAI models have the ability to summarize text.

5.

Which command is used to launch a Jupyter Notebook from Anaconda Navigator?

1 / 1 point

☐

Run a Python script to start Jupyter

☐

Navigate to the Jupyter website and sign in

☒

Select 'Jupyter Notebook' and click 'Launch'

☐

Type 'launch Jupyter' in the terminal

Correct

Correct! In Anaconda Navigator, you simply select 'Jupyter Notebook' and click 'Launch' to start it.
