1.

In LangChain, which module would you use for generating and working with prompts?

1 / 1 point
- ☒

Prompt module

☐

Agents module
- ☐
- Chains module

☐

Callbacks module

✔

Correct

Correct! The Prompt module is designed for generating and working with prompts.

2.

What are the three major types of language models?

1 / 1 point

☒

LLMs, chat models, text embedding models

☐

LLMs, neural networks, decision trees

☐

Text classification models, sentiment analysis models, translation models

☐

LLMs, image recognition models, speech synthesis models

✔

Correct

Correct! The three major types of language models are LLMs, chat models, and text embedding models.

3.

Which of the following tasks can be performed using code to interact with an OpenAI model?

1 / 1 point

☐

Optimizing server performance

☒

Processing the input

✔

Correct

Correct! Processing the input is essential for generating meaningful output from the model.

☒

Collecting user input

✔

Correct

Correct! Collecting user input is a fundamental task when interacting with an OpenAI model.

☒

Displaying the output on a web application

✔

Correct

Correct! Displaying the output on a web application is a common use case for interacting with an OpenAI model.

☐

Running machine learning algorithms

4.

What steps are involved in implementing a conversational AI application using Streamlit and ChatGPT?

1 / 1 point

☒

Configure the Streamlit interface

✔

Correct

Correct! Configuring the Streamlit interface is crucial for creating an interactive user experience.

☒

Integrate ChatGPT with Streamlit

✔

Correct

Correct! Integrating ChatGPT with Streamlit is essential for enabling conversational capabilities.

☒

Install the necessary libraries

✔

Correct

Correct! Installing the necessary libraries is a fundamental step in implementing a conversational AI application.

☐

Develop a front-end using React

☐

Optimize the application for mobile devices

☐

Set up authentication protocols for users

5.

What is the primary purpose of chat models in conversational AI?

1 / 1 point

☐

To perform complex mathematical calculations

☒

To generate human-like responses in a conversation

☐

To store user data securely

☐

To monitor network traffic

✔

Correct

Correct! Chat models are designed to generate human-like responses to facilitate natural conversation.
