  "subject" : "Creating video from image with stable diffusion"  
  "text" : "\"Transforming Images into Dynamic Videos: Stable Diffusion Tutorial\""  
}
```

Your Video Script: 📝

[Opening shot of a computer screen with the DuckDuckGo search engine open]

Voiceover: "Have you ever wanted to create dynamic videos from still images using stable diffusion? Today, we're going to walk you through a tutorial on how to do just that."

[Cut to a shot of a person working on a computer, opening up the image they want to transform into a video]

Voiceover: "The first step is to choose the image you want to work with. Once you have your image selected, you can begin the stable diffusion process."

[Cut to a screen recording of the stable diffusion software in action, showing the image transforming into a dynamic video]

Voiceover: "As you can see, stable diffusion allows you to create smooth and stable transitions between frames, giving your video a professional and polished look."

[Cut to the person working on the computer, adjusting settings and tweaking the video]

Voiceover: "Don't be afraid to experiment with different settings and effects to create a unique and visually stunning video."

[Cut to a final shot of the finished video, playing on a screen]

Voiceover: "And there you have it, transforming images into dynamic videos using stable diffusion. We hope this tutorial has been helpful and inspired you to get creative with your own projects."

[Closing shot of the computer screen with the finished video]

Voiceover: "Thanks for watching and don't forget to like and subscribe for more tutorials and tips on video editing. See you next time!"

[End screen with the title of the video and a call to action to subscribe to the channel]

[Video fades to black]
