1.

What is one of the main advantages of utilizing LLMs reasoning capabilities in ticket classification?

1 / 1 point
- ☐

It simplifies the model training process

☒

It improves the accuracy of classifying tickets based on context

☐

It reduces the need for data preprocessing

☐

It eliminates the need for a user interface
- ✔ Correct

Correct! LLMs reasoning capabilities enhance the model's ability to understand and classify tickets based on contextual information.
2.

Which of the following are necessary steps in building an ML model for ticket classification?

1 / 1 point
- ☒

Data preprocessing

☒

Correct

Correct! Data preprocessing is essential for cleaning and preparing the data for modeling.

☒

Saving the model for future use

☒

Correct

Correct! Saving the trained model allows it to be used for future predictions.

☐

Using raw data without modifications

☐

Ignoring missing values

☒

Model training

☒

Correct

Correct! Model training involves feeding preprocessed data into the machine learning algorithm to build the model.
3.

What is one of the main objectives of pushing data to Pinecone in the context of HR resume screening?

1 / 1 point
- ☐

To analyze resumes using machine learning algorithms.

☒

To facilitate efficient document retrieval based on user queries.

☐

To implement the frontend user interface.

☐

To create a unique ID for user-uploaded documents.
- ✔ Correct

Correct! Pushing data to Pinecone helps in efficiently retrieving relevant documents based on user input.
4.

What is the primary purpose of using OpenAI in the HR resume screening assistance tool?

1 / 1 point
- ☐

To populate a documents list with metadata.

☐

To establish connections with Pinecone for document retrieval.

☒

To analyze and shortlist resumes based on job descriptions.

☐

To create a unique ID for user-uploaded documents.
- ✔ Correct

Correct! OpenAI can help analyze resumes and match them against job descriptions to streamline the screening process.
5.

What should you understand about the availability of the Llama two model?

1 / 1 point
- ☐

It can only be used with proprietary software.

☐

It is restricted to mobile devices.

☐

It is available only during specific hours of the day.

☒

It is available in both cloud and on-premises solutions.
- ✔ Correct

Correct! The Llama two model provides flexibility with both cloud and on-premises solutions.
