Project description

LangChain Community

downloads/month 24M License MIT

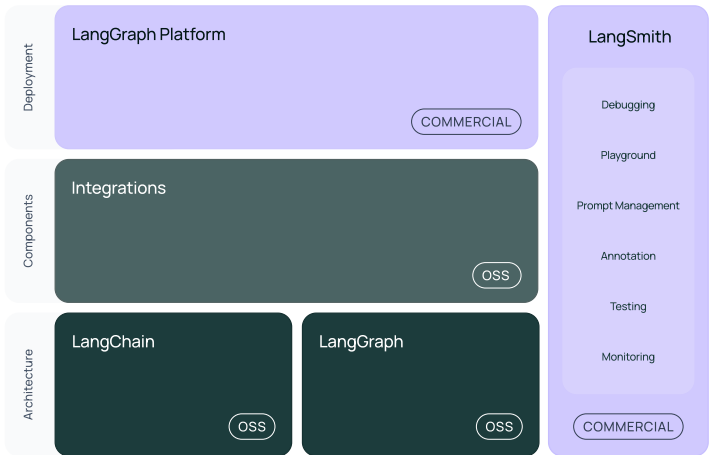

Quick Install

pip install langchain-community

What is it?

LangChain Community contains third-party integrations that implement the base interfaces defined in LangChain Core, making them ready-to-use in any LangChain application.

For full documentation see the [API reference](#).

Releases & Versioning

langchain-community is currently on version 0.0.x

All changes will be accompanied by a patch version increase.

Contributing

As an open-source project in a rapidly developing field, we are extremely open to contributions, whether it be in the form of a new feature, improved infrastructure, or better documentation.

For detailed information on how to contribute, see the [Contributing Guide](#).

[!NOTE] Contributing a new integration? LangChain has published a [guide on implementing new Langchain-* integration packages](#) and is recommending this in most cases to help decouple versioning and support varied testing infrastructures. See [docs](#) for details.
