Getting slides and notebooks

Practice with Lab Sandbox

0:06 / 0:45 2x

Lecture slides are available in PDF format from (a) the "resource" links next to each video lecture, and (b) this GitHub repo:

https://github.com/BenLangmead/ads1-slides

The Jupyter notebooks used in the practical sessions are available in ipynb format from this GitHub repo:

https://github.com/BenLangmead/ads1-notebooks

You don't *need* to download or use these notebooks (or to use Jupyter at all) to finish the course assignments. But in past sessions I have noticed that many students want the notebooks, so here they are.I tested the notebooks with both Python 2 and Python 3 kernels and both worked fine. If you notice any problems, including Python version compatibility problems, please let us know on the forums.

Best,Ben
