Module 4
Graded Assignment • 30 min

Due Nov 18, 11:59 PM IST

Your grade: 100%

Your latest: **100%** • Your highest: **100%** • To pass you need at least 70%. We keep your highest score.

Next item →

1. The slow (sometimes called “brute force”) algorithm for finding the shortest common superstring of the strings in set S involves: 1 / 1 point

✓ Nice work

2. Which of the following is **not** a true statement about the slow (brute force) shortest common superstring algorithm. 1 / 1 point

✓ Nice work

3. Which of the following is **not** a true statement about the greedy shortest common superstring formulation of the assembly problem? 1 / 1 point

✓ Nice work

4. True or false: an Eulerian walk is a way of moving through a graph such that each node is visited exactly once 1 / 1 point

✓ Nice work

5. If the genome is repetitive and we try to use the De Bruijn Graph/Eulerian Path method for assembling it, we might find that: 1 / 1 point

✓ Nice work

6. In a De Bruijn assembly graph for given k, there is one edge per 1 / 1 point

✓ Nice work

7. Which of the following does not help with the problem of assembling repetitive genomes: 1 / 1 point

✓ Nice work
