2. What are the NLP tasks solved by AutoML? 1 / 1 point

Text classification

Like

Dislike

Report an issue

Entity extraction

Sentiment analysis

All of the above

Correct

This option is correct

3. What are the major stages of an end-to-end workflow to build an NLP project with Vertex AI? 1 / 1 point

Data preparation, model training, and model serving

Dataset upload, feature engineering, and model training

Model training, model evaluation, and model deployment

Model deployment, model monitoring, and model serving

Correct

This option is correct
