1. ALS and WALS create embedding tables for both users and items. Because these are held in memory, it's important to plan for their size. How big would you expect the embedding table for the users to be?

1 / 1 point

Try again

✔ Proportional to the number of users.

✔ Correct
Correct

✔ Proportional to k, the number of dimensions in your embedding space.

✔ Correct
Correct

☐ Proportional to the number of users multiplied by the number of items.

☐ Proportional to the number of users squared.

Your grade

100%
