We are going to test with this story:
- We are going to run your program 25 times to check different random variations

Once upon a time there was a _animal. The _0 lived in a very scary _place. One day, the _0 left his _2 and went in search of a _food. The _0 wandered for _time and finally reached a _place. In that _8 the _0 encountered a _magiccreature with a _thing. _greeting! _said the _11. What brings you to my _8, the _11 asked waving his _12 towards the _0. I left my _2 in search of a _5 because I was hungry and my _2 is quite a scary place. Do you have any _5 here the _0 _said? Why it just so happens that I do have one the _11 _14. However, I will only share it with you if you help me fix my _12, which is not quite working right at the moment. Oh _12 repair _said the _0? Why that is my area of expertise. Let me take a look at your _12. The _11 handed his _12 to the _0, who promptly fixed it, and was rewarded with a _5. The _0 and _11 became best friends and lived happily ever after in the _8.

The end.

That looks good to me! Great job

- We are going to run your program 25 times to check different random variations

There once was an _animal who fell in love with a _magiccreature. The _0 asked the _1 out on a date. The _3 _said "Sure why not? Lets go to the _place and have a _food. Is _time from now good for you?"

The _0 was excited and _said "Sounds great, I love eating _7 at the _6, but can we do it in _time instead of in _8?"

"No problem!" replied the _1.

The _0 and _1 went on a lovely date at the _6, ate a lot of _7 (as well as some _food and some _food), and lived happily ever after.

That looks good to me! Great job

_greeting _said the _animal in greeting. Welcome to my _place You are welcome to stay _time but no longer. After _time you must go forth and bring me a _thing, a _thing, a _thing, and some _food, which is the best food. If you bring me _food instead, that is alright, but do not even think about bringing me _food. _9 is my favorite, I love it so much! _10 is alright, but _11 is no good. Do not even think of bringing _11 to my _4, it will just stink up the place.

Oh and watch out for the _animal in the next _4 over! He is tricky.

That looks good to me! Great job

Overall Grade: PASSED
