✔ **Correct**

Correct! The Pauli

☐ It changes the phase of the qubit by

- It flips the qubit state from $|0\rangle$ to $|1\rangle$ and vice versa.

☐ It measures the qubit state in the X basis.

☐ It entangles the qubit with another qubit

 Comment

☐ To reset qubits to their initial states

☐ To measure quantum states accurately

Ⓒ To alter the probability amplitude of quantum states

☐ To create entanglement between qubits
