Exercise: Extend the Function Calling Agent

00 0:08 / 0:30 2x 🔊 ⚙️

This is an optional exercise to practice.

The agent can't do a lot right now in a notebook. See if you can extend the agent to be able to list the contents of a directory. Then, try putting a small number of files with textual information in a directory and asking the agent to "read all the files in <fill in the directory path> and tell me what they are".

You can copy this notebook to get started:
