A Classic Puzzle

Ready to review what you've learned before starting the assignment? I'm here to help.

Help new practice Let's chat

1. Here's a famous old multi-number puzzle. A student sends home an addition problem, written out in letters:

1 / 1 point

SEND

+ MORE

Assignment details

Due Attempts

Each of the 8 distinct letters ~~STAND~~ ~~SEND~~ ~~SEND~~ ~~SEND~~ ~~SEND~~ ~~SEND~~ ~~SEND~~ ~~SEND~~ stand for a distinct digit from 0 to 9. (For example, if "ME" means "5", then no other letter can stand for "5".) Then, you know right away that neither "S" nor "M" in our problem can mean "0".

Submit your answer by copying and pasting the following, but replacing lowercase variables with the relevant digits:

S=x, E=y, N=z, D=w, M=u, O=v, R=p, Y=q

Your answer may not be recognized if you don't directly copy the above line of text and substitute digits

S=x, E=y, N=z, D=w, M=u, O=v, R=p, Y=q

Try again

10/14/00

Your grade

To pass you need at least 80%. We keep your highest score.

Correct

Correct: This is 100 / 1.

2. Now actually solve the puzzle from the previous question (it's not easy, but it's not a killer, either):

1 / 1 point

SEND

+ MORE

Assignment details

Due Attempts

The numbers in the addition problem are assumed to be written in standard fashion, where the first digit is not "0". Thus, you know right away that neither "S" nor "M" in our problem can mean "0".

Submit your answer by copying and pasting the following, but replacing lowercase variables with the relevant digits:

S=x, E=y, N=z, D=w, M=u, O=v, R=p, Y=q

Your answer may not be recognized if you don't directly copy the above line of text and substitute digits

S=x, E=y, N=z, D=w, M=u, O=v, R=p, Y=q

Correct

Correct: This is 100 / 1.
