Practice Quiz: Labelling Points on a Graph – Review Information
3 questions

Reading: The Pyplot Text Function
10 min

Video: 4.1c: Labelling all the Points on a Graph
3 min

Practice Quiz: Labelling all the Points on a Graph – Review Information
2 questions

Reading: For Loops in Python
10 min

Interpreting the Data

Week 4 Outro and Assessment

For Loops in Python

[This page](#) presents some examples of for loops in Python, which I used in the video to label all the points on the graph.

I used the Pandas iterrows() function whereas those examples tend to use the range() function. Here is a link to the [Pandas documentation](#) for iterrows().

Why does my for loop have two things after 'for' instead of one?
