Vega-Altair: Declarative Visualization in Python

Vega-Altair is a declarative visualization library for Python. Its simple, friendly and consistent API, built on top of the powerful [Vega-Lite](#) grammar, empowers you to spend less time writing code and more time exploring your data.

Getting Started

In the Getting Started section you can find installation instructions and a high-level overview of the main concepts.

User Guide

Check out the User Guides for in-depth information on the key concepts of Vega-Altair.

Examples

The Examples gallery contains a selection of different visualizations which you can create with Vega-Altair.

API

The API reference guide contains detailed information on all of Vega-Altair’s methods and classes.

The Vega-Altair open-source project is not affiliated with Altair Engineering, Inc.
