

Creating and Training a CNN

Open and work through **CreatingAndTrainingACNN.mlx** in Course 1 > Module 1 of the course files to complete this reading.

The live script will guide you through creating and training a CNN from scratch for the fastener dataset.

In addition to the code from the "Creating and Training a CNN for Classification" video, this reading includes techniques for understanding your data and investigating your network's layers. These strategies will be helpful throughout the course and appear in several assessments.
