📝 Submit your assignment

Great work! You've made it to the final section of the project.

The final part of this project asks you to apply your trained model to 9 new, unlabeled images.

These images are in the "Unlabeled" folder of ASL Alphabet/Classification/ in the course files.

Use your classifier to translate the letters from the speaker's message. Then, use this quiz to determine which letters your model has correctly classified.

Because your model had relatively small training, validation, and test sets, you shouldn't expect it to be perfect. You only need 5 correct letters to pass Part 3 of the project, but as an added challenge, see if you can translate the whole message! Take advantage of each letter's confidence scores and the confusion chart for your test dataset.

We keep your highest score

1. What is the 1st letter?

1 / 1 point

G

👉 Correct
2. What is the 2nd letter?

1 / 1 point

R

👉 Correct
3. What is the 3rd letter?

0 / 1 point

M

👉 Incorrect
4. What is the 4th letter?

1 / 1 point

A

👉 Correct
5. What is the 5th letter?

1 / 1 point

T

👉 Correct
6. What is the 6th letter?

1 / 1 point

W

👉 Correct
7. What is the 7th letter?

0 / 1 point

B

👉 Incorrect
8. What is the 8th letter?

1 / 1 point

R

👉 Correct
9. What is the 9th letter?

1 / 1 point

K

👉 Correct
