Intro to Claude AI Quiz
Graded Assignment • 20 min

Due Oct 26, 11:59 PM IST

Your grade: 100%

Your latest: **100%** • Your highest: **100%** • To pass you need at least 90%. We keep your highest score.

Instructions

1. Which of the following steps are necessary to deploy a Claude-powered project to the cloud? **1 / 1 point**

- [x] Configure cloud infrastructure

  Nice work

  Correct. Configuring the cloud infrastructure is a crucial step in deploying any project to the cloud.

- [ ] Purchase an on-premise server
- [x] Ensure proper security measures are in place

  Nice work

  Correct. Ensuring proper security measures are in place is essential to protect your project and data in the cloud.

- [x] Set up continuous integration and continuous deployment (CI/CD) pipelines

  Nice work

  Correct. Setting up CI/CD pipelines helps in automating the deployment process and ensuring that your project is always up-to-date.

- [ ] Manually update the code on the server

2. What is the best way to handle errors in a JavaScript app that uses Claude AI for text processing? **1 / 1 point**

- ( ) Ignore errors and hope they go away.
- ( ) Restart the app every time an error occurs.
- (•) Use a try-catch block to handle errors gracefully.
- ( ) Let the errors be shown directly to the user.

  Nice work

  Correct! A try-catch block can help you catch errors and handle them without crashing the app.

3. Which technique can be used to instruct Claude to generate more detailed answers in responses? **1 / 1 point**

- ( ) Use vague and general statements
- (•) Provide specific and detailed prompts
- ( ) Limit the prompt length to one sentence
- ( ) Ignore context and background information

  Nice work

  Correct! Providing detailed prompts helps Claude understand the context and requirements better, leading to more comprehensive answers.

4. When handling API interactions, which HTTP status code indicates a successful request? **1 / 1 point**

- ( ) 401 Unauthorized
- ( ) 404 Not Found
- ( ) 500 Internal Server Error
- (•) 200 OK

  Nice work

  Correct! The HTTP status code 200 OK indicates that the request was successful.

5. When building a text summarizer, which natural language processing (NLP) technique is commonly used to reduce the length of the text while preserving its main ideas? **1 / 1 point**

- ( ) Part-of-Speech tagging
- ( ) Named Entity Recognition (NER)
- ( ) Word2Vec embedding
- (•) TextRank algorithm

  Nice work

  Correct! The TextRank algorithm is widely used for text summarization by ranking sentences based on their importance.

6. Which of the following best describes Anthropic's commitment to AI safety and ethics? **1 / 1 point**

- ( ) Focusing solely on maximizing AI performance and efficiency.
- ( ) Implementing AI systems that operate independently of human oversight.
- (•) Developing AI systems that prioritize human values and ethical considerations.
- ( ) Creating proprietary AI systems with restricted access to ensure safety.

  Nice work

  Correct! Anthropic is dedicated to creating AI that aligns with human values and prioritizes ethical considerations.

7. Which of the following best describes one of Claude's primary capabilities in the AI landscape? **1 / 1 point**

- ( ) Image Recognition
- ( ) Autonomous Driving
- (•) Natural Language Understanding
- ( ) Financial Forecasting

  Nice work

  Correct! Claude is designed to excel in understanding and processing human language.
