Building with the Claude API

Today's Skill Points 15 XP
See skill progress

Module 1
Getting Starting with Claude

API Fundamentals and First Steps

- Introduction to the module
  Reading • 5 min
- Overview of Claude models
  Video • 3 min
- Working with the API
  Reading • 10 min
- Getting an API key
  Reading • 10 min
- Explore the Claude documentation
  Reading • 10 min
- Setup your development environment
  Reading • 15 min
- Making a request
  Video • 6 min
- Multi-turn conversations
  Video • 8 min
- Build a simple chat bot
  Video • 3 min
- Getting started with the Claude API
  Graded Assignment • 15 min
- Exploring the Claude API
  Dialogue • 15 min

Controlling Claude's Output

- System prompts
  Video • 6 min
- Exercise on writing a system prompt
  Video • 1 min
- Temperature
  Video • 6 min
- Response streaming
  Video • 8 min
- Controlled model output
  Reading • 10 min
- Structured data
  Video • 5 min
- Structured data exercise
  Video • 4 min
- Optimizing model output
  Graded Assignment • 10 min
- A dialogue on controlling output
  Dialogue • 15 min
- Next steps
  Reading • 5 min

Module 2
Prompt Engineering & Evaluation

Module 3
Claude Features and Tool Use

Module 4
Model Context Protocol (MCP)

Module 5
Retrieval Augmented Generation (RAG)

Module 6
Claude Code & Computer Use

Module 7
Agentic Workflows

Introduction to the module

4 XP • Prototyping and Strategic Evaluation of Generative AI | 3 XP • Resilient Systems and Third-Party Integrations

0:54 / 1:10 2x

Welcome to Getting Started with Claude

Welcome to the first module in the Building with the Claude API series! This module will teach you the fundamentals of working with Claude's API to build AI-powered applications.

What You'll Learn

In this module, you'll master the essentials of the Claude API:

- Understanding Claude model variants and selecting the right model for your use case
- Authenticating and making your first API requests
- Building multi-turn conversations that maintain context
- Controlling Claude's behavior with system prompts
- Adjusting response style using temperature and other parameters
- Working with streaming responses for real-time interactions
- Extracting and generating structured data

Prerequisites

This module assumes basic programming knowledge in any language. We'll provide examples in Python.

Module Structure

The module is divided into two modules:

1: API Fundamentals and First Steps - Learn the basics of working with Claude's API, from authentication to building conversational interactions.

2: Controlling Claude's Output - Master techniques for customizing and controlling how Claude responds to your requests.

Let's get started!
