5 Courses

Mathematical Foundations for Computing

Applied Mathematical Methods for Computing

Geometry and Calculus for Computing

Logic and Reasoning for Computing

Algorithms and Complexity

Jun 30, 2026

SANDIPAN DEY

has successfully completed the online Specialization

Essential Mathematics for Computer Science

The Essential Mathematics for Computer Science specialisation provided the fundamental toolkit needed to excel in computing, data science, and software engineering. Across five courses, the participant progressed from core mathematical foundations to advanced topics that underpin modern computer science. By completing this specialisation, the participant gained industry-relevant skills in discrete mathematics, logic, algebra, calculus, probability, and algorithmic reasoning. Whether their goal is to pursue further study in computer science, strengthen their programming and problem-solving skills, or advance in fields such as data science or systems design, this specialisation ensures the participant has the rigorous mathematical foundation that employers and universities expect.

Dr Omar Karakchi BSc MSc DPhil
Lecturer, Computer Science BSc MSc online
Goldsmiths, University of London

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
