Advanced Malware and Network Anomaly Detection

Today's goal • 3/3 items

Module 1
Course Introduction

Course Overview
Reading • 5 min

Instructor Biography - Lanier Watkins
Reading • 2 min

Module 2
Malware Threats Detection Part 1

Module 3
Malware Threats Detection Part 2

Module 4
Network Anomaly Detection with AI

Course Overview

0:23 / 1:06 2x

Welcome to **Advanced Malware and Network Anomaly Detection**! This course is designed to build your expertise in detecting and mitigating advanced threats using AI. This course is structured using 3 modules:

- **Module 1:** Malware Threats Detection Part 1
- **Module 2:** Malware Threats Detection Part 2
- **Module 3:** Network Anomaly Detection with AI

Following is a brief description of each module:

Module 1: Malware Threats Detection Part 1 introduces the basics of malware detection using AI. You will learn about different types of malware and the AI techniques used to identify them.

Module 2: Malware Threats Detection Part 2 continues from Part 1, exploring more advanced techniques and tools for detecting and analyzing malware threats.

Module 3: Network Anomaly Detection with AI shifts focus to network security, where you will learn about detecting unusual patterns and anomalies in network traffic using AI methods.

This course equips you with the skills needed to tackle complex malware and network threats using advanced AI technologies.
