Introduction to AI for Cybersecurity

Today's goal • 3/3 items

Module 1
Course Introduction

Course Overview
Reading • 10 min

Instructor Biography - Lanier Watkins
Reading • 2 min

Module 2
AI for Cybersecurity Professionals

Module 3
Ham or Spam? Detecting Email Cybersecurity Threats with AI

Module 4
Securing User Authentication

Course Overview

0:18 / 1:23 2x

Welcome to **Introduction to AI for Cybersecurity**! In this course, we will explore how artificial intelligence is revolutionizing the field of cybersecurity. This course comprises the following 3 modules:

- **Module 1:** Course Introduction
- **Module 2:** AI for Cybersecurity Professionals
- **Module 3:** Ham or Spam? Detecting Email Cybersecurity Threats with AI
- **Module 4:** Securing User Authentication

Here is the brief detail of all the modules:

Module 2: AI for Cybersecurity Professionals introduces the fundamental concepts of AI and its relevance to cybersecurity. You will learn about the various AI techniques and their applications in protecting digital assets and data.

Module 3: Ham or Spam? Detecting Email Cybersecurity Threats with AI dives into one of the most common cybersecurity threats: Phishing and spam emails. We will examine how AI algorithms can distinguish between legitimate and malicious emails to enhance security.

Module 4: Securing User Authentication uses AI to secure user authentication processes. You will learn about AI-driven techniques for verifying user identities and preventing unauthorized access.

By the end of this course, you will have a solid understanding of how AI can be leveraged to improve various aspects of cybersecurity, from email threat detection to user authentication.
