Course Welcome

Module 1 Introduction

Lesson 1: What Does AI Represent or Mean? Reviewing Basic Definitions and AI history

Lesson 2: Size of AI Market and Growth Rate

Lesson 3: Key Technology Catalysts for AI's Development

Module 1 Summative Assessment

Module 1 Summary

**Reading:** Module 1 Summary
10 min

# Module 1 Summary

After completing all of the materials, please take a moment to reflect on what was covered. The learning objectives below capture the key takeaways from this module:

- Understand AI's history; commonly used labels such as Narrow AI, Broad AI, Artificial General Intelligence (AGI); CPUs versus GPUs/NPUs versus IPUs etc.; general purpose computing versus accelerated computing.
- Develop a comprehensive understanding of AI market size forecasts, AI growth rate, and other metrics.
- Understand the contributions to AI's Development story from computer chips (especially GPUs), the shift to accelerated computing, and the related transition from Retrieval-based computing to Retrieval-augmented generative computing.
