Instructions

1.

Based on the reading [Fast Consumer Trends are emerging at a pace](#), what is the main implication for businesses of these two emerging computing trends (cloud and edge)?

1 / 1 point
- ☐ Businesses will need to completely abandon traditional on-premise IT infrastructure.

☐ Companies will have to choose between adopting cloud computing or edge computing.

☒ Businesses will gain more flexibility and efficiency in managing their data processing needs.

☐ The complexity of managing IT infrastructure will significantly increase for businesses.

Correct
2.

According to the PowerPoint Slides for Module 1, what is Artificial General Intelligence (AGI)?

1 / 1 point
- ☐ An AI system that accomplishes tasks beyond human intelligence.

☒ AGI systems are limited to specific domains or tasks.

☐ An AI system is characterized by its limited life span.

☐ An AI system cannot learn or adapt to new situations without reprogramming.

Correct

AGI is defined as an AI system that accomplishes tasks beyond human intelligence.
3.

According to the article [Fast Consumer Trends are emerging at a pace](#), what is one of the key trends emerging in computing that is impacting businesses?

1 / 1 point
- ☐ The increasing reliance on personal computers for everyday tasks.

☒ The growing importance of cloud-based computing solutions for data storage and processing.

☐ The development of more powerful desktop computers for graphically demanding applications.

☐ The decreasing need for businesses to invest in their own IT infrastructure.

Correct
4.

According to [The Role of AI in Healthcare: A Big Game](#), what is one area where philanthropy can leverage AI for positive change?

1 / 1 point
- ☐ Funding the development of more powerful AI hardware.

☐ Automating social media marketing for charitable organizations.

☒ Analyzing complex biological data to advance medical breakthroughs.

☐ Replacing human workers in repetitive tasks within charities.

Correct

Analyzing complex biological data to advance medical breakthroughs.
5.

Where are NPUs most likely to be found according to the passage [What is an NPU? The new AI chips explained](#)?

1 / 1 point
- ☐ NPUs are more similar than CPUs.

☒ Primarily in high-performance computing centers and specialized AI devices.

☐ Only in supercomputers designed for scientific research.

☐ They are still under development and not yet commercially available.

Correct

It is primarily used in high-performance computing centers and specialized AI devices. Integration in consumer electronics is increasing but not yet universal.
6.

According to [What is AI? Can we distinguish between AI and non-AI systems?](#), how are AI systems typically developed?

1 / 1 point
- ☐ Entirely through manual programming.

☐ Solely through machine learning algorithms.

☒ Through a combination of techniques, including machine learning and manual programming.

☐ By training a computer on a massive dataset of human brains.

Correct
7.

According to the PowerPoint Slides for Module 1, what characterizes Narrow AI?

1 / 1 point
- ☐ It accomplishes tasks beyond human intelligence.

☐ It can perform complex tasks simultaneously.

☒ It is limited to a specific domain or task.

☐ It operates autonomously without human intervention.

Correct

Narrow AI is indeed limited to a specific domain or task.
8.

According to the reading [Do laptops use Accelerated Computing](#), what is a key advantage of using accelerated computing systems over traditional CPUs for specific tasks?

1 / 1 point
- ☐ Lower overall cost for processing large datasets.

☐ Improved user experience for running everyday computer programs.

☒ Significantly faster processing speeds for tasks suited to parallel processing.

☐ Ability to handle a wider variety of data formats compared to traditional CPUs.

Correct

Significantly faster processing speeds for tasks suited to parallel processing. Accelerated computing offloads specialized processors for tasks that can be broken down into smaller parts.
9.

According to the passage [Accelerate AI: We, with the new GPU-based cloud platform](#), G-Core Labs and Graphcore are the two companies mentioned in the passage in relation to the GPU-based cloud platform. Which of the following statements about their roles is most likely based on the reading?

1 / 1 point
- ☐ G-Core Labs designed and manufactures the IPUs (Intelligent Processing Units) themselves.

☐ Graphcore provides cloud computing services, and G-Core Labs offers the IPU technology.

☒ Both G-Core Labs and Graphcore collaborate to develop and deliver the IPU cloud platform.

☐ The passage doesn't provide enough information to determine the specific roles of each company.

Correct

Both G-Core Labs and Graphcore collaborate to develop and deliver the IPU cloud platform. The reading suggests a joint effort.
10.

According to the interview summary [Take Five: 5 Questions on AI](#), what is one of the key takeaways on AI?

1 / 1 point
- ☐ AI is about to reach human-level intelligence and capabilities.

☐ AI can solve all the world's most pressing problems by itself.

☐ Businesses are not prepared for AI.

☒ Understanding AI and its capabilities is crucial for various aspects of modern life.

Correct
11.

Based on the article reading: [AI Tech Events Predict Which Industries and Sectors will benefit the most from AI](#), which of the following is mentioned as a potential benefit of AI adoption across various industries?

1 / 1 point
- ☒ Increased efficiency and productivity.

☐ Reduced risk of human error in critical tasks for the retail industry.

☐ Creation of new job opportunities in AI development and maintenance in the avionics industry.

☐ Reduced overall costs through automation and optimization for the construction industry.

Correct

The passage highlights efficiency gains as a major benefit of AI.
12.

What is the main takeaway from the reading article: [1.4.4 Milestones in The History of Artificial Intelligence \(AI\)](#) about the future of AI?

1 / 1 point
- ☐ AI is about to surpass human intelligence entirely.

☐ The potential applications of AI are limited and well-defined.

☒ Continued progress in AI is inevitable and will bring significant changes.

☐ There is no consensus among experts on the future direction of AI.

Correct
13.

According to the article [1.4.4 Milestones in The History of Artificial Intelligence \(AI\)](#), which of the following is NOT considered a milestone in the history of Artificial Intelligence (AI)?

1 / 1 point
- ☐ The development of the first chess-playing computer to defeat a world champion.

☐ The creation of a robot with basic seeing, moving, and conversing abilities.

☐ The demonstration of a radio-controlled boat in the late 18th century.

☒ The invention of a user-friendly interface for interacting with AI systems.

Correct

The invention of a user-friendly interface for interacting with AI systems. The passage focuses on advancements in core AI capabilities, not user interfaces.
14.

Based on the reading [Unleashing the Power of CPUs: A Game-Changer for Neural Networks](#), how does leveraging CPUs for neural networks impact the development process?

1 / 1 point
- ☐ It reduces the need for human intervention and expertise in training models.

☒ It allows for training to much larger and more complex neural networks than with GPUs alone.

☐ It eliminates the need for large datasets when training neural networks.

☐ It significantly reduces the cost of training and developing neural networks.

Correct
15.

According to the article [1.4.4 Milestones in The History of Artificial Intelligence \(AI\)](#), advancements in AI have historically been:

1 / 1 point
- ☐ Steady and linear.

☒ Cyclical, with periods of progress followed by setbacks.

☐ Solely focused on replicating human intelligence.

☐ Driven entirely by the development of faster computers.

Correct

Cyclical, with periods of progress followed by setbacks (AI winters).
