2.

According to the reading article titled **AI leader says field's new territory is promising but risky**, what is the main concern expressed by the AI leader regarding the "new territory" in the field?

1 / 1 point

Difficulty in obtaining the necessary computing power for research.

The new territory might not lead to significant advancements.

Need for responsible analysis and release of AI technologies in this new territory.

Lack of qualified researchers specializing in the area.

Correct

The article emphasizes the importance of being "brave" and responsible, including conducting thorough risk and benefit analyses before releasing new AI technologies.

3.

According to the summary in "**Take Five - 5 Questions on AI**", Which of the following statements best represents the author's view on the future role of AI in the workforce?

1 / 1 point

AI will enhance human work rather than replace it, making employees more efficient.

AI will lead to mass unemployment as it replaces all human jobs.

AI exactly thinks like human intelligence does.

AI deployment will eventually be crucial for businesses to remain competitive.

Correct

Balasubramanian notes that businesses are under significant pressure to adopt AI due to "fear of missing out", with a concern that "If I do not embrace AI, my competitors will race ahead." This clearly supports the idea that AI deployment will eventually be crucial for businesses to remain competitive.
