 Instructions

Correct
This is because AI lacks imagination and the ability to create something truly original without relying on existing data or patterns.

The PowerPoint slide for Module 4 implies which of the following as AI's current state in terms of common sense?

☐ AI has fully developed common sense.

☐ AI displays common sense and judgment in all tasks.

☒ AI displays common sense or judgment only as needed by a task.

☐ AI has the ability to make value judgments independently.

☒ Correct

This reflects the PowerPoint slide statement that AI displays common sense or judgment only as needed by a local task.

According to the article [Strengthening the bonds of human-machine collaboration: Deloitte report, November 2022](#)¹⁷, which role describes AI systems that perform mental, structured tasks under human supervision?

☐ The muse.

☐ The Doppelgänger.

☐ The prioritizer.

☐ The subordinate.

☒ **Correct**

The subordinate AI is described as performing mental, structured tasks such as extracting key data from documents under human supervision.

8. According to the article [12 Most Powerful Use Cases in the Enterprise Today](#), which of the following is a benefit that AI can bring to enterprise customer service?

☐ Understanding the nuances of complex customer complaints.

☒ Answering frequently asked questions and offering basic support.

☐ Providing fully personalized recommendations to every customer.

☐ Replacing the need for human customer service representatives entirely.

☒ Correct

10. A potential drawback of AI/ML implementation, as mentioned in the reading [Understanding AI/ML Use Cases](#), is:

☐ Increased efficiency in various sectors.

☐ Ability to adapt and improve over time.

☒ Risk of bias based on the data used to train AI/ML models.

☐ Need for humans to take frequent breaks while working alongside AI/ML.

☒ Correct

12. According to the reading [Bias and Costs of AI for the legal profession](#), what is a concern raised about the use of AI in the legal field?

☐ Improved access to legal services for all.

☐ Potential bias in AI algorithms based on training data.

☒ Lawyers need to take additional training to use AI.

☐ Increased workload for legal professionals.

Incorrect

While training might be needed, it is not the main concern.

14. The reading article [Understanding AI/ML Use Cases](#) or mentions AI/ML can be used to 1 / 1 point

- ☐ Completely replace human workers in all industries.
- ☒ Automate tasks and free up human time for more strategic work.
- ☐ Provide definitive solutions to complex ethical dilemmas.
- ☐ Design and manufacture entirely new products on its own.

☒ Correct

According to the reading article [on Cognitive Learning](#), which of the following is NOT a described capability of AI?

☐ Data interpretation for real-time insights.

☐ Personalized learning experiences.

☐ Object identification in videos.

☐ Automation of repetitive tasks.

☒ Games

While the article discusses machine learning and its ability to learn from data, identify patterns, and make data-driven decisions, there is no specific mention of "personalized learning experiences" as a capability of AI in this context. The article instead emphasizes recommendation systems for products or content by *data* not *extended to personalized learning*, making this the correct answer because the question is about identifying what is NOT a described capability of AI.
